Hobbies

In my spare time, I enjoy In martial sports such as Rubik's cube and knife tricks. I especially like how a sense of self expression is very visibly shown by just a few tricks with different people that play this sport/activity; which is how I view creative project as well. But most importantly, I enjoy hanging with my friends outdoors for activities, or play games with them online. I often record the interactions with them, and I make fun videos about them.
